

APPLICATION ENGINEER

Do you have the ambition to bring a new product to the market? Do you have an affinity with life science and technology? Are you looking for both a commercial and a technical challenge? Look no further!

We are looking for an application-driven engineer to support our customers, who are changing the world of medical treatment. You will work closely with dynamic and cross-functional teams (product management and sales/marketing), as well as a worldwide customer base, on ground-breaking life science applications.

The company:

Optics11 Life is a life science instrumentation company that is addressing an exciting new market opportunity. With its unique optical fiber sensing-based measurement instruments, it is providing enabling technology for emerging processes that will revolutionize medical treatment. These new processes concern improved drug development processes and new regenerative therapies, all based on the possibilities offered by 3D cell cultures such as Organ-on-a-chip and organoids.

Optics11 was founded in 2011 as a university spin-off. With a promising unique technology based on optical fiber sensing, the first product was built in 2012: an extremely sensitive measurement device that could break new ground in the field of tissue engineering and regenerative medicine. After this product, many more unique sensing products were developed and put on the market. The company now has two business units serving different markets with different products: Optics11 Life and Optics11 Industrial Sensing. Over the last years, the company has grown rapidly and employs over 70 professionals, with an installed base of successful products all over the world.

Key activities of an Application Engineer:

- Being strongly involved in customer success and satisfaction
- Providing advanced application support to our customers and distributors
- User testing of our equipment (hard- and software)
- Performing on-site and remote training of customers
- Performing sales support activities
- Performing experiments and validating applications together with key customers
- Contributing to webinars and seminars
- Creating technical, support, and marketing content in English

The ideal candidate:

- Bsc or Msc (Life Science, Biomedical or Physics)
- Team player
- Fast and eager to learn
- Strong English writing and speaking skills
- German or French writing and speaking skills are a plus
- Strong customer-facing skills
- Experience with handling scientific instrumentation
- Commercial/business understanding
- A structured and organized way of working
- Availability for traveling
- Sales or customer care experience is a plus

The offer:

- An opportunity to make a significant impact on the growth of Optics11 and to develop your soft- and technical skills
- Being part of a young, dynamic, and enthusiastic team
- Work in a challenging international environment.
